Zero Gravity
Difference...**

No One Else Has It!

Only Golden Technologies lift and recline chairs feature MaxiComfort™, our patent-pending zero gravity technology that allows you to relax in the zero gravity position developed by NASA.

In the zero gravity position, your legs are elevated above your heart, creating an open angle between your torso and thighs. This position puts your back in the correct resting posture, where the S-curve of your spine is properly maintained and virtually all pressure on the lower back is relieved. This position has beneficial effects on many other areas of the body: lung capacity is expanded to ease breathing and boost oxygen levels; and circulation improves to minimize stress on the heart, leaving you with less muscle fatigue.

The MaxiComfort™ zero gravity position approximates the weightless conditions of outer space, in which the body experiences an absolute minimum of internal and external stresses. The benefits of resting in the MaxiComfort zero gravity position include:

Correct Spinal Alignment. The proper neutral position for the S-curve of your spine is maintained along the three regions of your back: cervical (neck), thoracic (upper back) and lumbar (lower back).

Back Pressure Relief. The lumbar region (lower back), especially, is relieved of almost all pressure. Disc compression is greatly reduced or eliminated completely.

Expanded Lung Capacity. Via the open angle created between the torso and thighs, breathing is improved, thereby increasing the oxygen levels in the blood.

Improved Circulation. With the legs elevated above the heart, stress on the heart is minimized, and the oxygen-rich blood being pumped to fatigued muscles helps them to recover faster.

The Neutral Position. The neutral posture position maintains the four natural curves of your spine to minimize strain on supporting muscles and ligaments. This is the optimal posture to prevent back and muscle pain.

What You Want to

Advantages

	Recline/lower chair back Back Down button	Feel rested by lowering the back angle
	Raise the back Back Up button	Feel more comfortable while eating or watching TV
	Raise foot board Activate MaxiComfort™ Raise seat Foot Board & Seat button	Extend your legs, then raise the seat
	Lower foot board & Lift the chair Foot Board & Lift button	Lower your legs, then lift the chair
	Lower the chair, Extend foot board, Raise the seat Sit & Recline button	Control multiple features with only 1 button
	Raise the back, Lower seat, Lower the foot board, & Raise the chair Close & Lift button	Control multiple features with only 1 button
